

## Manufacturing Process

Customer requests counter sample development or Fantasia's product catalogue picks.

Fantasia develops and provides sampling and lab dips for approval.

Testing laboratory carries out physical and Colorfastness tests on samples and bulk production.

Laboratory provides certification of such products for customer reference.

Bulk production is checked for Quality Assurance from Knitting/weaving, dyeing, finishing and packing, for conformity to buyer specification.

100% inspection is carried out on selected specific orders according to customer specification.

Excellent packing facilities provide Rolling, Spooling, Festooning, Layering and lapping facilitating extra efficiency at the customer's manufacturing process points.

Delivery of goods by Fantasia local customer facilities or shipped to foreign markets.
